

CYBERDEFENSES

Protect 2020

ELECTION SECURITY BUNDLE

The time to secure your 2020 election is now.

- ELECTION-SPECIFIC SECURITY EXPERTISE
- KEY TECHNOLOGIES REQUIRED
- EASY-TO-UNDERSTAND REPORTS
- COMPREHENSIVE ASSESSMENT AND MONITORING SERVICES

Whether it's nation-state attackers seeking to affect election outcomes, domestic activists intent on furthering their agendas by casting doubt on vote tallies or criminal actors who want to profit from stolen data, many election attacks start long before the actual election.

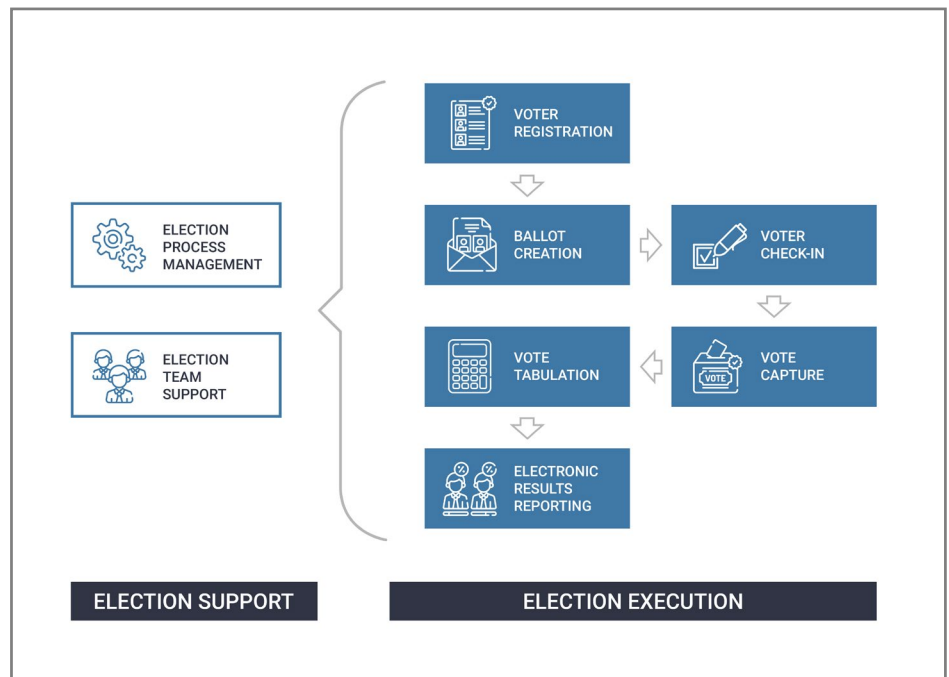

Getting ready for 2020 requires a full evaluation of your environment, new expertise and new technology to insure you are taking all of the necessary steps, to make Security a part of your everyday election process.

The **Protect 2020 Election Security Bundle** gives you the most effective election security services available and a clear path to strong security in advance of the 2020 election. The plan is specific to your election process so you don't waste time or resources on ineffective strategies or services. Plus, straightforward pricing simplifies budgeting and execution.

CyberDefenses election security services address the entire process from voter registration to electronic results reporting. Each aspect of the election is reviewed by cybersecurity experts to identify potential areas for county security to improve the county's security posture.

PRICING MODEL

The Protect 2020 Bundle sets a pre-defined price for the full set of services, starting immediately and running through the end of December 2020. Clients may choose to pay the entire amount at the start of the program or to break the total amount into quarterly payments. This structure provides each county with a pre-defined value to establish the cost of the required security updates. Contact elections@cyberdefenses.com to receive an immediate quote based upon the number of registered voters in your county.

DEEP EXPERIENCE

Founded in 2001 by a team of returning military cybersecurity veterans, CyberDefenses staff is comprised of battle tested cybersecurity professionals. CyberDefenses is a premiere cybersecurity services vendor with deep experience in Security Operations, Threat Intelligence, Guidance and Identity Services.

CyberDefenses clients include the US Air Force, local and state governments and commercial entities of all sizes. Our teams have provided election security services at both the state and local levels, nationwide.
