

CYBERDEFENSES

# ELECTION SECURITY MONITORING

24/7 Election Security Monitoring ensures your defenses are always strong.

- ELECTION-SPECIFIC SECURITY EXPERTISE
- SIMPLE MONTHLY PRICING
- EXTENSIVE THREAT KNOWLEDGE
- STATE-OF-THE-ART SECURITY OPERATIONS CENTER

## DEDICATED TEAM CONSTANTLY ON ALERT TO DEFEND AGAINST THREATS

**Election Security Monitoring (ESM)** gives you a dedicated team of the best security analysts, intelligence specialists and Cyber Navigators always watching for breaches, data tampering, and stolen identities that could compromise your election. Applying military cybersecurity best practices, the team is ready to immediately thwart attempted attacks to minimize any damage and enable you to continuously serve voters and maintain high confidence in voting results.

In addition to 24 X 7 Security Operations Center monitoring of your internal network, systems and devices, we also monitor the Darknet to detect unwanted activity early enough to effectively address it. You'll benefit from our knowledge of where to look to find stolen data that may already be for sale in underground cybercrime markets as well as our proven methodologies for identifying threat actors who could negatively affect your election. Every county also receives election security Cyber Navigator support to help you continuously improve your security and keep bad actors out.

## INCLUDES

- ✓ 24/7 Threat Monitoring
- ✓ 1-800 Hotline
- ✓ Security Log Collection
- ✓ Network Monitoring
- ✓ Host Monitoring
- ✓ Vulnerability Scanning
- ✓ Darknet Monitoring
- ✓ Cyber Navigator Support

# ELECTION SECURITY MONITORING DELIVERS A COMPREHENSIVE APPROACH TO THREAT DETECTION

CyberDefenses Election Security Monitoring (ESM) Services go much further than standard Security Operations Center services. Most counties are considering the installation of an Albert Sensor to provide security monitoring services. The Albert sensor provides strong network monitoring capabilities, but does not provide the full range of security monitoring features required for your election.

## ECM brings commercially available military-grade cybersecurity to elections
